W05-P2: get 9 photo using small sizes

W05-P3: Use grid to show 4 photos in a row

The screenshot shows the Visual Studio Code interface with two open files: `blog.html` and `blog.css`. The `blog.html` file contains the following code:

```
<link rel="stylesheet" href="./blog.css">
<body>
  <section class="blogs">
    <div class="section-title">
      <h2>Latest Blogs</h2>
    </div>
    <div class="blog-center">
      <article class="blog">...</article>
      <article class="blog">...</article>
      <article class="blog">...</article>
      <article class="blog">...</article>
    </div>
  </section>
</body>
```

The `blog.css` file contains the following CSS rules:

```
.grid {
  display: grid;
  grid-template-columns: 1fr 1fr 1fr 1fr;
  width: var(--fluid-width);
  max-width: var(--max-width);
  margin: 0 auto;
  gap: 2rem;
}

.blog {
  padding: 10px;
  border: 1px solid #ccc;
}
```

A browser window titled "Blog Demo" shows the rendered "Latest Blogs" section with four cards. Each card contains a photo, a category icon, a category name, a descriptive text, and a "Read More" link. The browser's developer tools are open, highlighting the `grid` class in the CSS panel.
